

“Kor-Pak Corporation Industrial Braking System Rebuild Program”

Kor-Pak offers both complete and partial rebuilds and we can restore your brake to “like new” condition at an extremely competitive price

We are proficient in Spring Applied Electric and Hydraulic Brakes and can remanufacture a wide variety of brake models/types including: AC Thruster Brakes, DC Magnet Brakes, Motor Mounted Brakes, Drum Brakes, Disc Brakes, Actuators (i.e. electro-hydraulic AC and DC thrusters), Windmill Brakes, Caliper Disc Brakes (spring, hydraulic, and air applied), Draw-Works Caliper Disc Brakes, Power Units (hydraulic and air).

We can rebuild your brake using OEM and aftermarket parts for the following brakes for most major brands including: Johnson, Mondel, Square D, Svendborg, Twiflex, Stearns, Cutler Hammer, Clark/Challenger, Westinghouse, Whiting, EC&M, Bubenzer, P&H, Sibre, Wagner.

Kor-Pak uses the highest-integrity materials for our spare parts and we can provide actuators (i.e. coils, thrusters), power units, pins, bushings, shoes, pads, discs (including ventilated discs), controls, springs, and various other components you will need to ensure that your industrial braking system is running at optimal capacity. We offer a 1-year mechanical warranty for all rebuilds and all requisite mechanical and electrical testing is performed prior to shipping. We can also offer an exchange program which allows for a seamless transition and dramatically shortens lead time. Kor-Pak's skilled friction services department can provide virtually any type of friction pad at a competitive price. Whether it be a complete assembly or reline service, Kor-Pak has the ability to keep your brake in service with our high-integrity friction materials and competent engineering competencies.

Let Kor-Pak service your industrial braking system and be your exclusive provider for spare parts and service. We are available 24/7 for technical support and look forward to offering you first-class customer service.
