# Spring-Set Brake Module

For Holding Applications

## Warner Electric presents the latest addition to the Electro Module product line

The Spring-Set Brake Module is a NEMA C-face compatible unit designed to perform holding as well as occasional emergency stopping functions, making it particularly well-suited for motor brake applications. Because it is designed to be mounted on the front of a motor, it is an excellent choice for retrofitting an existing motor, or for use on custom designed machinery.

Applications include holding railroad crossing arms, basketball backboards, robotic arms, and assemblies on vertical ball screws.

# Spring-Set Brake Module

## Specifications and Dimensions

### Packaged Spring-Set Brake Module Features

- NEMA C-face compatible mounting
- Performs holding functions with occasional e-stops
- Completely assembled and preburnished at the factory
- Easy to install
- No adjustment required
- High torque, lead-free and asbestos-free friction material
- UL and CUL listed
